

Return-to-College Program for Veterans with TBI

- Are you a veteran with traumatic brain injury (TBI)?
- Are you currently in college or returning to college?
- Are you experiencing difficulties in the classroom?

WE CAN HELP!

The UW Speech and Hearing Clinic in Madison is collaborating with the VA to provide these services for student veterans across Wisconsin with TBI:

- Testing to identify your strengths and challenges
- Training in the use of strategies that will help you succeed in college
- Help with listening aids for the classroom and other accommodations that will help you focus and learn

At your request, we will coordinate with your caseworker, the VA's Vocational Rehabilitation & Employment Program, and campus offices serving students with TBI.
