

Veterans Benefits Administration
Data and Information Services

**Counts of Wisconsin Veterans Age 65 or Older Receiving
Compensation Benefits and Rated at 100% Disabled
Data Request 05-103**

Summary

Data and Information Services (D&IS) provides the following response to a request from the VARO Milwaukee received on April 5, 2005.

VARO Milwaukee Request

VARO Milwaukee requested a count of Wisconsin veterans rated 100 percent service connected and age 65 or older.

D&IS Response

D&IS identified **1,022** veterans meeting these criteria using the RO in the award to identify Wisconsin veterans. D&IS identified **1,006** veterans meeting these criteria using the mail code in the award to identify Wisconsin veterans.

Sources

D&IS used the end of month March 2005 Compensation and Pension Master Record (CPMR) files.

Limitations

The RO of jurisdiction in the CPMR may not necessarily coincide with where the veteran actually resides. The mail code should coincide with the veteran's address of record (barring errors), but the address of record may be inaccurate. We used both methods to identify Wisconsin veterans. Age 65 or older was calculated based on the veteran having a date of birth of April 7, 1940, or earlier.
